Customer Behavior Analysis – Alfido Tech

Objective: Analyze customer behavior to identify purchase patterns, churn risks, and provide actionable business recommendations.

GitHub Link: https://github.com/369nikita/Customer-Behaviour-Analysis---Alfido-Task1

Key Insights:
- Clothing and Books are the most purchased categories (~75K each).
- Monthly purchases are stable (~5400–5800 orders).
- Quantity is positively related to total purchase, but price variation exists.
- Age has minimal impact on spending behavior.- Around 20% customers have churned.

Recommendations:
- Focus on top categories (Clothing, Books).
- Run campaigns to boost growth.
- Promote high-value products.
- Use behavior-based targeting.- Improve retention strategies.
